EDUCATION

Euro School

10th-96 Percentage, 12th-86 Percenatge

Airoli, Mumbai

Iitian Spectrum Edutech

94 Percentile in JEE Mains, 25k Rank in JEE Advance

Thane

2023 – 2025

EXPERIENCE

DJS Antariksh

Science Member

May 2026 – Present

DJ Sanghvi, Ville Parle

- Conducted research on space missions and scientific instrumentation, translating technical/scientific literature into digestible presentations for club members
- Developed and delivered technical sessions on astrophysics and astrobiology topics, bridging complex research (spectroscopy, mission payloads, detection methods) with peer-level understanding

DJS Dhadak

Events and PR Senior Co-Com

Nov 2025 – Present

DJ Sanghvi, Ville Parle

- Coordinated event planning and execution for club performances/showcases, managing logistics, scheduling, and cross-team communication
- Handled publicity and outreach for club events, including promotional content and audience engagement to drive turnout

DJS eXpress

Marketing Member

February 2026 – August 2026

DJ Sanghvi, Ville Parle

- Drove outreach and promotional campaigns for public speaking events, including brand partnerships and audience engagement strategy.

PROJECTS

Markowitz Portfolio Optimization Model | *Python, Streamlit, Conda, yfinance, pandas, Scipy, Matplotlib*

- Engineered a Python-based portfolio optimization engine implementing Modern Portfolio Theory, computing efficient frontiers through numerical optimization
- Extended the model into an interactive Streamlit web app with dynamic data visualizations, enabling real-time portfolio allocation based on user-defined inputs

PaisaDiary | *JavaScript, SQL, Gemini API, Google AI Studio*

- Built and published an AI-powered expense tracking web app, integrating a Gemini agent for natural language expense categorization and logging
- Collaborated with a teammate under hackathon time constraints to design, build, and ship a functional end-to-end product with a SQL backend

CAPM Model | *Python, Pandas, NumPy, yFinance, Scikit-learn, Streamlit*

- Developed a Capital Asset Pricing Model (CAPM) to analyze stock risk, calculate Beta, market risk premium, and expected returns using historical market data.
- Integrated Machine Learning to identify market regimes and provide additional insights into stock risk and performance.
- Extended the model into an interactive Streamlit application with dynamic stock selection, parameter inputs, and risk-return visualizations.

StockMaster-Real-Time Inventory and Predictive Restocking System | *React.js, JavaScript, Python, SQL*

- Engineered a full-stack inventory tracking system featuring real-time stock monitoring, automated alert triggers, and an intuitive dynamic dashboard using React and Python.
- Developed a predictive ML model using Scikit-learn and Pandas to analyze historical consumption patterns and accurately forecast restocking schedules to prevent stockouts.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, HTML

Frameworks: React, Node.js, Streamlit, WorldQuant, Conda

Developer Tools: Git, Google Antigravity, Google AI Studios, Google adk Workspace, VS Code, Kali Linux, PyCharm, Cursor, Jupyter Notebook

Libraries: pandas, NumPy, Matplotlib, yfinance, scikit-learn

Certifications: Python, Ethical Hacking, Quantitative Finance, Engineering AI Agents with Google Cloud, 3x Hackathons including HackPrep, MS Excel, Prompt Engineering and Gen AI
